Valentino Creations Hornet

Valentino Creations luggage is a work of art, just like its handbags, and it will remain high fashion for years to come thanks to its innovative style. Designer luggage never looked so good, seriously. So, if you're a traveller and you need some new gear, check out this new line-up of new, ultra lightweight and structurally tough polycarbonate suitcases. They come with a pop colour travel luggage case for flair and excitement. The impact resistant and sturdy material is made to survive rough handling, unscathed. It's ideal for those who are always on the go, whether it's a trip around the world or a weekend getaway. Aside from practicality, the collection looks stunningly stylish. You are bound to get looks. The bonus in this is Valentino Creations' TSA combination lockset, justifiably boasting the slimmest frame in the market.

Columbia Switchback

The new Columbia Switchback watches feature striking colour contrasts on the bezel ring against Columbia's signature ventilated silicone strap that sits lightly and comfortably on the wrist throughout a strenuous workout.

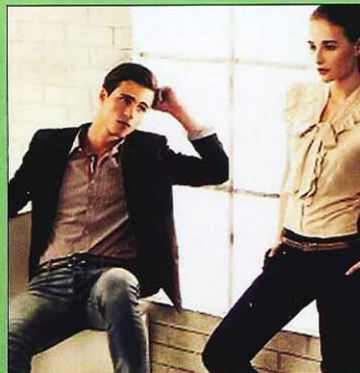

Soleus GPS Fit

With marathon running becoming the de rigeur citizen sport, the Soleus GPS Fit is perfect for serious novice runners on the lookout for an affordable yet excellent GPS running watch.

Esprit Baker

With a 46mm case, this new watch from Esprit is certainly an attention grabber. Inspired by the world of pilots and the military, it includes three subdials on the face and a fine quartz movement. Expect a soft leather strap to come with this ensemble.

Biem "Living Colours" for 2013

Themed "Living Colours", this collection from local fashion house Biem promises to offer more than just work wear in various vibrant colours. It encourages modern men and women to express themselves by mixing and matching colours in an unconventional and bold manner.

DC Wes Kremer

The latest release from DC, which is having a phenomenal skateboarding year, is the Wes Kremer. The super suede skin of the shoe holds up well over hours and hours on the board and the insole alone justifies the price. It's simple but great.
